Submarine Cable & Pipeline Services... Remotely Operated Vehicle and Diving Systems

NUC is dedicated to offering their telecom, power utility and cable installation customers a full array of underwater construction, inspection and tooling services. Our technical and operational experience ensures that our customers receive safety conscious, innovative and cost effective solutions to their particular needs. Our crews and equipment are available as fly-away units. Most of our systems can be mobilized and flown to the project in hours. In addition, our ROV's are manufactured in Aberdeen, Scotland to withstand the conditions associated with the North Sea. Our low-drag, high-powered vehicles can extend the operational time in heavy currents. For more system information please visit: www.sub-atlantic.co.uk. Please call to speak to one of our representatives.

Services
