## VESSELS SERVICES

NUC is known for providing the most advanced undersea technology available for inspection, maintenance and construction. That reputation holds up above water too.

An integral part of any water based project is the support vessels. This is a logistical item where quality is frequently overlooked, however, we know that safety, reliability, seaworthiness, speed, and comfort are all issues that can make or break a project. We are used to working in the most extreme conditions on the planet – we want our customers and our personnel to have the upper hand.
